

CDB-420

The CDB-420 has been designed to have a high note and cash capacity like the CDA-460 but with a smaller footprint. The ingenious design of the CDB-420 enables the same high capacity insert to be used across both models. This provides the added benefit of reducing the number of inserts and lockable lids to be stocked to support more than one model.

The CDB-420 is also available in a stainless steel version. It has been designed specifically to meet the demands of butchery, delicatessen and produce retailers. In these environments an electronic scale can be mounted on top of the cash drawer. To withstand the weight of the scale, the top surface of the drawer is provided with additional re-enforcement. The drawer tray benefits from both horizontal and vertically mounted runners. The drawer is manufactured from brushed stainless steel to prevent rusting if scratched. The posting slots have been removed and wherever possible all other apertures where food particles could be trapped have been welded and ground off.

FEATURES

- Fully adjustable insert with 5 note compartments and 10 coin cups
- Built with three position release lock
- Dual posting slots with media storage
- Microswitch for open/closed drawer status
- Fixed 24 volt solenoid and interface cable configured to suit Epson, Axiohm and Star printers

OPTIONS

- Textured Eposn Grey or Black finish
- Lockable lid for insert tray
- Dual voltage [12/24 volt] solenoid and sub 'D' 9 way male connector on a 0.5m fly lead enabling connection via a choice of adaptor cables to all major PoS terminals or peripheral devices
- Random release locks or no lock options are available to special order at additional cost

SPECIFICATION

- Width: 420mm
- Height: 116mm
- Depth: 420mm
- Net weight: 10kg
