

The Key to your Cash Drawer requirements

CDS-460

Fabricated from steel the ECD Flip Lid model has been tested to an excess of 1 million opening cycles, and has been designed to be compatible with all types of checkout. Integration with the PoS terminal or system printer is achieved via a standard RJ12 plug and fixed 24 volt solenoid.

The ECD Flip Lid is offered with a painted steel lid and with an additional lockable lid which secures the contents of the drawer when the insert is being removed to the back office for cash reconciliation. Designed and manufactured to strict ISO 9002 standards, there is no comparable product to meet the price and performance of the ECD Flip Lid cash drawer.
